

The Surgeons Link is a full-service locum tenens agency specializing in providing trauma surgeons on a temporary basis. Recognizing that orthopedic and neurosurgical back-up are vital to the success of any trauma program, The Surgeons Link also provides locum tenens orthopaedists and neurosurgeons with interest and experience in providing trauma care. The company's principal partners each have over twenty-five years of hands-on experience in addressing physician shortages in trauma centers, community hospitals and academic medical centers.

"Our trauma service recently experienced a critical need for trauma surgeons. We were referred to The Surgeons Link by Connie Potter with The National Foundation for Trauma Care (NFTC).

The Surgeons Link was able to identify a well-qualified locum candidate with fellowship training and board certification in trauma & surgical critical care. Within a short time the Doctor was licensed, credentialed and ready to start work. Throughout the process, we worked directly with one of the principals of the agency. He served as a single point of contact so that we weren't handed off from one representative to another. We found them to be easy to work with and very knowledgeable in the specialty. The surgeon that they sent us was highly motivated, professional, provided excellent patient care, and showed genuine concern for our system.

If a critical physician staffing need should arise in your trauma program, we highly recommend The Surgeons Link."
